The Academy’s mission is to serve the public and the U.S. actuarial profession. How will your service on the Board allow you to further the Academy’s mission of public policy and professionalism?

I intend to use my seat at the Board table to find more direct and timely ways to bring insights, solutions, and education to the growing concerns of accessibility and affordability of insurance across all sectors here in the United States. I will also look to play a larger role in advocacy with regulators and legislators at the state and federal levels to properly position actuarial considerations impacting the public. I plan to ensure our credibility as a profession that embodies high standards of ethics is not taken for granted by mitigating potential reputational risk and promoting our professionalism standards in additional ways to members and stakeholders.
